## Education

Brooklyn College  
B.S. Computer Science

Brooklyn, New York  
June 2023

## Projects

**Payment Tracker:** React, node.js, MongoDB

Allows users to create accounts and access their own payment trackers. They can then add, delete, and edit entries. The entries are stored on MongoDB.

**Random Quote:** React

A simple react website that generates a new quote on click.

**Markdown Previewer:** React

Allows the user to input markdown text and see how it would look.

**Drum Machine:** React

A sound board that allows the user to play music with either their mouse or keyboard.

**Java Parser:** Java

A parser that allows the user to input math functions. If they are in the proper format it will solve for all the variables.

## Skills

JavaScript

CSS

HTML

React

Java

C++
