Education

Brooklyn College   Brooklyn, New York
B.S. Computer Science   June 2023

Projects

Payment Tracker: React, node.js, MongoDB
Developed a full-stack web application that allows users to manage their payments. Features include user authentication, CRUD operations for payment entries, and data storage with MongoDB.

Random Quote: React
Created a simple and interactive React application that generates and displays a random quote upon click.

Markdown Previewer: React
Built a React application allowing users to input markdown text and preview the formatted output in real-time.

Drum Machine: React
Designed an interactive soundboard enabling users to play sounds via mouse clicks or keyboard inputs.

Java Parser: Java
A parser that allows the user to input math functions. If they are in the proper format it will solve all the variables.

Skills

- JavaScript
- CSS
- HTML
- React
- Java
- C++
- Unity
- SQL
- Node.js
